EXPERIENCE *iOS Engineer* Apr 13' - Present

Mobile Development, Roshka Squadra, Paraguay

- Coded and shipped six personal and business banking apps on iOS for Spanish, Brazilian and Paraguayan banks (top three banks in Paraguay)
- Both Objective-C and Swift apps in production
- Lead cross-platform development team (7 person) for iOS and Android
- Recognized need for, and coded in-house iOS library to provide native navigation to hybrid apps
- Both iPhone and iPad-only apps in production
- Regularly meet with clients to define needs, plan sprints, upload apps
- Ship app updates regularly to multiple apps with 2+ years in production
- Manage multiple iTunes Connect and Apple Developer accounts
- Experience with push notifications, GCD, table view search suggestions & history, Google Map custom animations, advanced auto layout, synchronous web view to native comms, Xcode automated cmd-line builds, certificate pinning, custom keyboards, custom side menus, custom view drawing

Engineer Intern Feb 12' - Jul 12'

Firmware Department, Biamp Systems, Australia

- Coded firmware for networked paging controller
- Interfaced with Atmel microprocessor, OLED display, capacitive-touch sensors and Ethernet network chip to allow the user to control volume (via an iPod-style click wheel) and change channels via a menu-style interface
- Designing and building PCB boards, creating BOMs, ordering materials

EDUCATION *Bachelor of Electronic and Computer Engineering*

- Advanced Digital Signal Processing (spoken word recognizer in MATLAB & C)
- Real-Time Systems (coded a Space Invaders clone in Verilog and C on an FPGA with custom keyboard and monitor controller)
